

On behalf of the
EASN Association and the University of
Manchester
we would like to invite you to the

MANCHESTER
1824
The University of Manchester
Aerospace Research Institute

5th EASN Association **International Workshop** on Aerostructures

which will be combined with the

6th General Assembly of the EASN Association

on September 2 - 4, 2015, at the University of Manchester, UK

Responding to the increasing interest from the European Aeronautics Community for a scientific event which combines **high quality, state – of – the – art presentations** from running or recently completed research projects with **new upstream ideas** for future research, EASN Association is delighted to announce the 5th out of a series of annual specialized Workshops, in the field of **Aerostructures**, which will be held on **September 2 - 4, 2015** at the **University of Manchester, UK**.

Like its predecessors, the **5th EASN Workshop** will offer its participants the opportunity to **network, discuss and interact** with researchers and professionals active in the specific field of Aerostructures.

Following the layout of the previous workshops, it is expected to be **a major dissemination event** where the vast majority of EC funded projects running at that time will be presented and a large number of attendees from **Academia and Industry** will have the opportunity to discuss the **latest advancements** in the area, together with **novel and innovative ideas** for future research.

During this 3-day event, the **General Assembly meeting of the EASN Association** will also take place. The General Assembly will discuss the achievements of the Board of Directors, will set the frame and will **provide guidelines for the future of the Association**. All colleagues are cordially invited to join the General Assembly.

The Workshop is co-organized by **the University of Manchester** and the **EASN Association**. Updated information about the workshop will be posted on a regular basis on the **EASN website** (at <http://www.easn.net>) as well as at the **5th EASN Workshop dedicated minisite** (at <http://workshop.easn-tis.com>). A second notification with the workshop leaflet and call for papers will follow shortly.

Looking forward to seeing you in Manchester!

Prof. Constantinos Soutis
