# Empower your engineering career with GEEP

## What you need to know about GEEP...

The Graduate Engineering Engagement Programme (GEEP) empowers engineering students to excel in their careers. It's an award-winning programme that's mostly remote with some face-to-face events. It supports UK students and graduates from underrepresented backgrounds into engineering employment.

Throughout a meticulously crafted curriculum, immersive workshops and mentorship from industry experts, GEEP offers an unparalleled opportunity to enhance your engineering expertise and thrive in the rapidly evolving world.

## What the programme offers you...

The programme is designed to boost your ability to secure engineering jobs. It does this by developing your skills, building your confidence, and showing you how to identify and capitalise on engineering opportunities.

## Apply here...

### Hear from GEEP alumni

"It's a supportive and inspiring environment where you can explore career paths, gain insights from industry experts, and see your unique perspective as a strength."

- GEEP Graduate

### Employability Skills Training

Build the skills, confidence and knowledge employers are looking for through interactive learning designed to prepare you for engineering careers.

### Work Exposure Opportunities

Explore the engineering industry through employer engagement, networking opportunities and real-world experiences that bring engineering careers to life.

### 1:1 Mentoring

Receive personalised guidance from an experienced engineering professional who will support your development and help you plan your next steps.
