

What should the engineering academic know about the European agenda?

Engineering Professors' Council - London - 12th April 2011

Julie Fionda
European Commission

Overview

- 1. The Challenge:** a Europe with increasing (and unmet) skills needs
- 2. A European Response:** Europe 2020 – a strategy for smart, sustainable and inclusive growth
- 3. Stimulating and supporting progress:** An EU reform agenda for the modernisation of higher education
- 4. What next:** how can HE systems respond?

1 – The Challenge

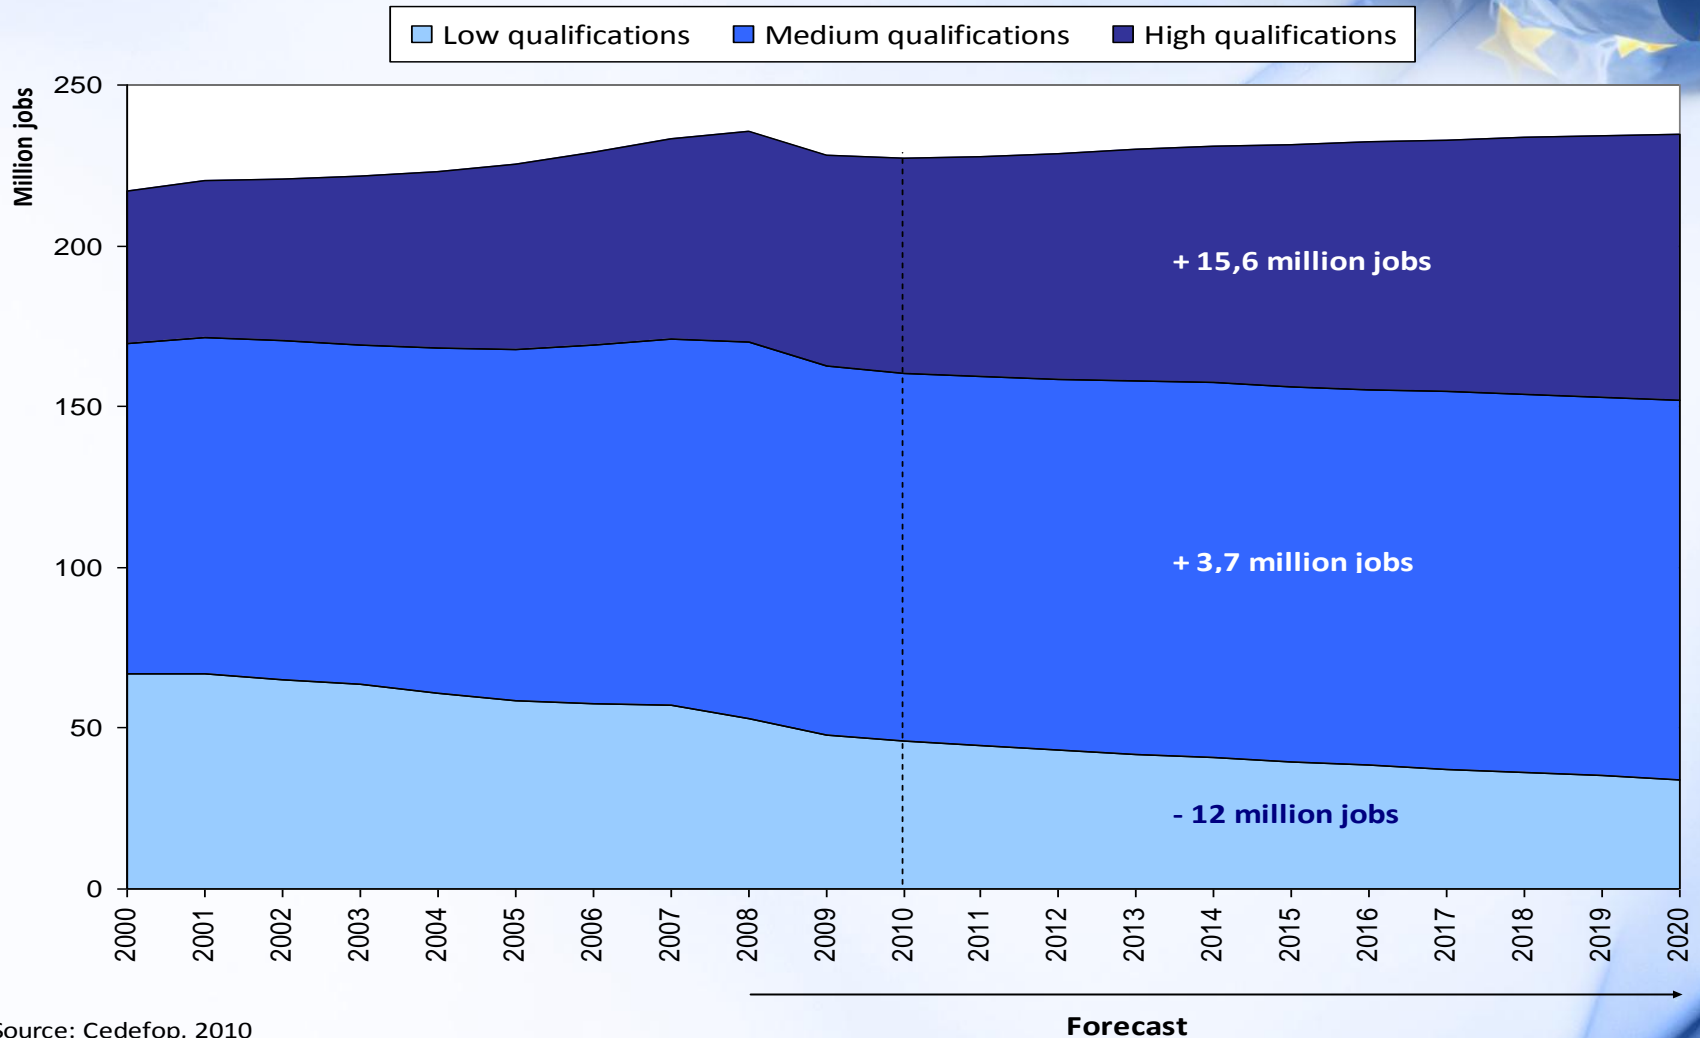

A Europe with increasing (and unmet) skills needs

What will the EU labour market look like 10 years or so from now?

- Employment in 2020: 235 million (~ pre-crisis peak, 2008)
- Jobs becoming more knowledge- and skills-intensive
 - Currently >80 million adults are hampered by low levels of basic skills
- Impact of globalisation and technological change is leading to changes in sectoral employment structure and demand for demand for new and different types of skills
 - The skills people have don't match skills needed to get jobs, this could worsen if we don't act
- Jobs employing highly qualified people > 1/3; **by 2020 35% of all jobs will require high-level qualifications**

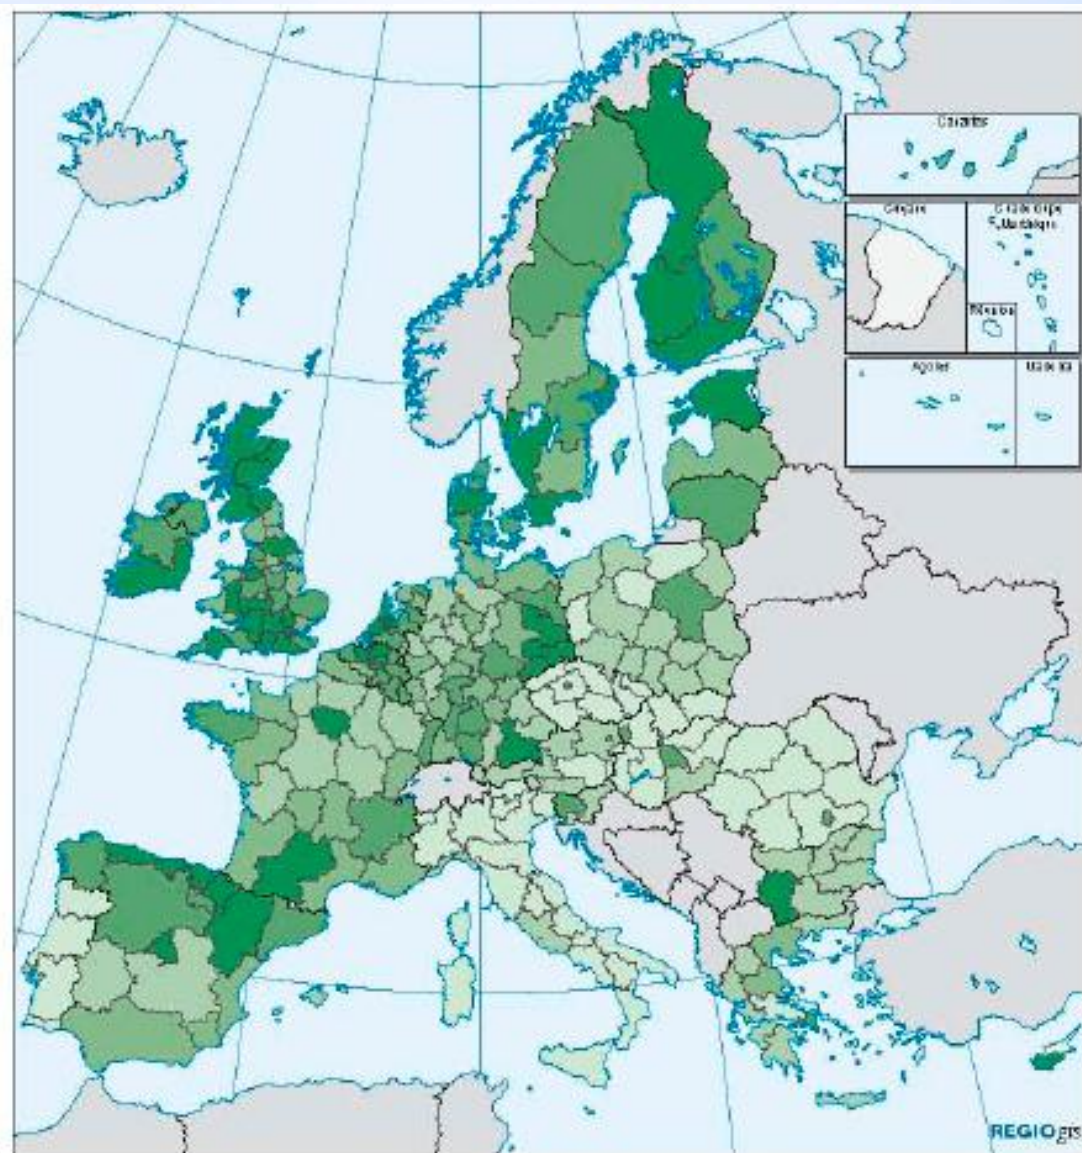

More jobs for the better qualified

Source: Cedefop, 2010

Forecast

Not enough people have high level education

% of total population aged 25-64

But, is going to university a waste of time?

- **Higher Education is expensive**
 - Cost to the student (living costs, tuition fees, administration/examination fees, opportunity cost)
 - Cost to the state (provision of education, subsidisation of other services eg. transport, health cover)
- **There is no guarantee of a job at the end of it**
 - Graduate unemployment and underemployment are giving increasing cause for concern.

Absolutely not!

- **HE is one of the best financial investments an individual can make:** private return on investment is high
 - wide differentiation by country (↑CZ, PT, PO↓SK, DK, SE, LT)
 - wide differentiation by university faculty (↑Engineering, Medicine ↓Agriculture, Humanities) and by university/ HE institution
- **The demand for higher education graduates is not saturated** - by 2020, 35% of all jobs will require high-level qualifications (today: 29%)
- **HE is a good insurance policy against unemployment**, and especially long-term unemployment

2 – A European Response

**Europe 2020:
a strategy for smart, sustainable and inclusive growth**

A European Response: If higher education is so important – what are we doing about it?

Higher education, at the centre of our strategy for growth and prosperity:

- Europe 2020 Strategy
- Flagship initiatives to drive progress
- A strategy for the Modernisation of Higher Education

Europe 2020: 3 interlinked priorities

1.) **Smart growth**: developing an economy based on knowledge and innovation

2.) **Sustainable growth**: promoting a more efficient, greener and more competitive economy

3.) **Inclusive growth**: fostering a high-employment economy delivering social and territorial cohesion

"Europe 2020 is about what we need to do today and tomorrow to get the EU economy back on track [...] We need to build a new economic model based on knowledge, low-carbon economy and high employment levels."

Europe 2020, June 2010

7 flagship initiatives

Smart Growth	Sustainable Growth	Inclusive Growth
<p>Innovation</p> <p><i>« Innovation Union »</i></p>	<p>Climate, energy and mobility</p> <p><i>« Resource efficient Europe »</i></p>	<p>Employment and skills</p> <p><i>« Agenda for new skills and jobs »</i></p>
<p>Education and employment</p> <p><i>« Youth on the move »</i></p>	<p>Competitiveness</p> <p><i>« An industrial policy for the globalisation era »</i></p>	<p>Fighting poverty</p> <p><i>« European platform against poverty »</i></p>
<p>Digital society</p> <p><i>« A digital agenda for Europe »</i></p>		

What can the European Commission do?

- Education Policy = national competence
 - « the EU's role is to contribute to the development of quality education by encouraging cooperation between Member States and, if necessary, by supporting and supplementing their action » (Lisbon Treaty)
- Develop the European dimension in education, encourage mobility and cooperation between universities
- Open method of co-ordination (benchmarking and peer learning amongst Member States)
- Strategic reflection and policy shaping
- Specific initiatives and instruments

Europe 2020 Targets

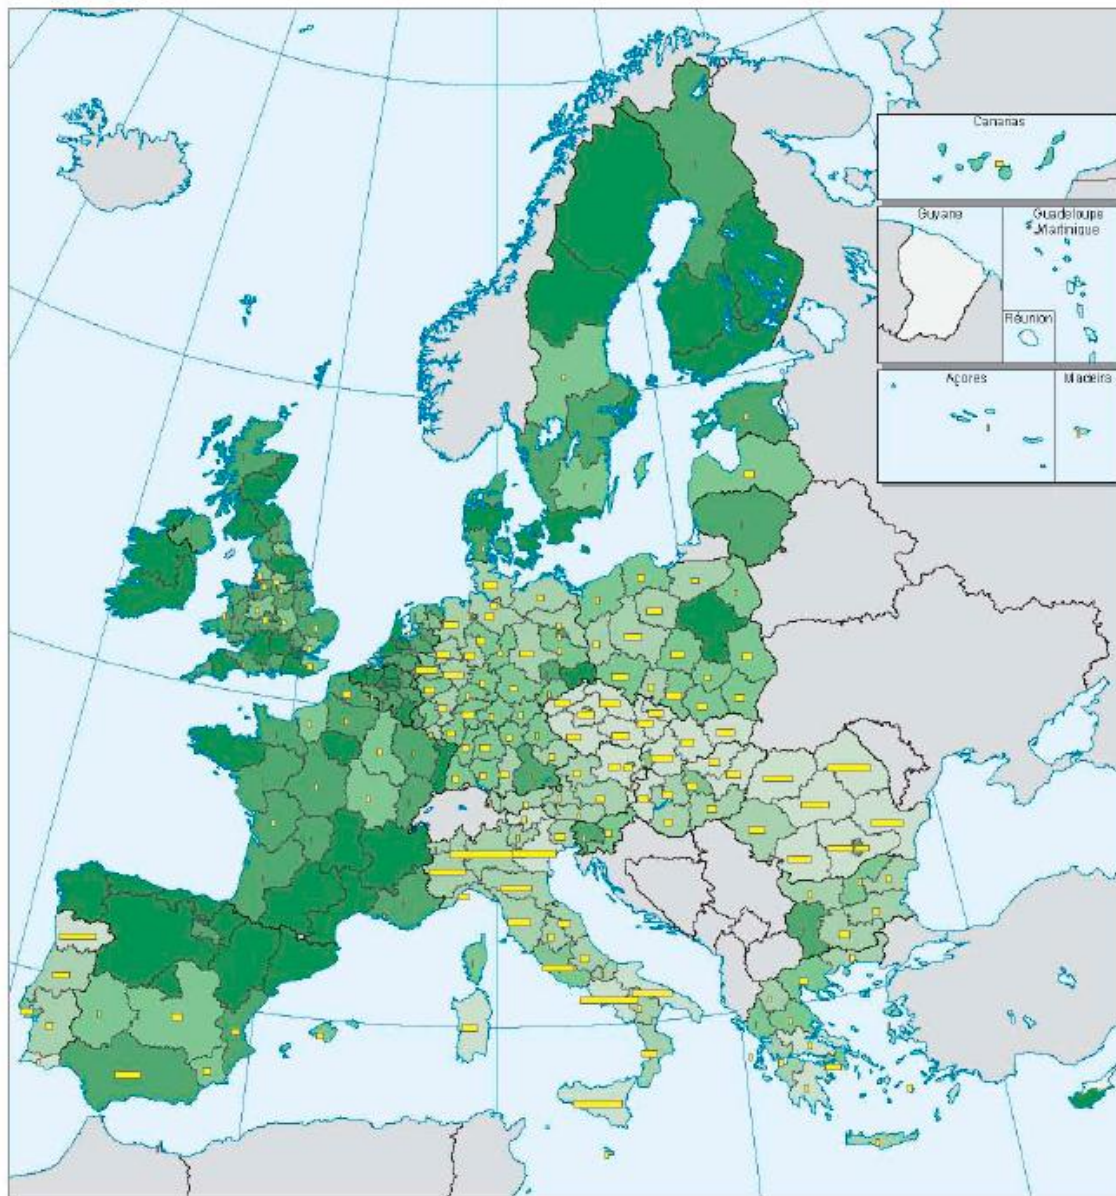

- **Education:**
 - ↓ the share of early school leavers to 10% (currently 15%)
 - ↑ increase the share of the population aged 30–34 having completed tertiary education to at least 40% (currently 32%)
- **Employment:** ↑ employment rate to > 75%
- **Research and development:** ↑ investment in to 3% of GDP + innovation indicator
- **Energy:** ↓ greenhouse gas emissions by > 20% & ↑ share of renewable energy to 20%, and ↑ energy efficiency by 20%
- **Poverty:** ↓ the number of Europeans living below national poverty lines by 25%

How are we doing compared to the European Benchmark?

(40% of 30-34yr olds to be qualified at HE level by Europe 2020)

The same as the last slide but a table

Share of 30-34 year olds with tertiary attainment, 2008 (%)

Evolution 2000-2008 (% relative change)

More people should reap the benefits of a university education

- **How will Europe reach the 40% benchmark?**
 - make higher education attractive to more school leavers and widen participation to non-traditional learners (eg mature students, lower SES, minority groups)
 - Reduce drop-out rates
 - More flexible pathways and attendance modes
- Each country will set a **national target** appropriate to their own circumstances
- University is not for everyone and **VET should be a valuable alternative**

But can our higher education systems cope?

- **Capacity**
 - Enough seats to put bottoms on?
 - Enough money to pay for expansion?
 - Enough professors – retirement time bomb?
- Is there a **trade off between quality and quantity?**
- **Diminishing exceptionalism?**
- **Competition for students**

3 – Stimulating and supporting progress

An EU reform agenda for the modernisation of higher education

Commission Communication on the Modernisation of Higher Education

- **Policy document** –
 - setting out key challenges, opportunities and recommending action at EU and Member State level
 - guiding EU spending priorities for HE
- Key theme: **How to achieve massification whilst maintaining high quality provision**
- To include an **internationalisation strategy**: how can European HE be more attractive to students and academics from beyond our borders; how can we co-operate better

What will HE systems look like in the next 10 years or so?

- What do **countries and regions** need?
- What do **students** want?
- What do **employers** want?
- How can higher education be **responsive to the needs of society and the labour market** but also shape the future?

How can the EU help transform European universities into global leaders?

- Promoting excellence in teaching and human capital development
- Ensuring excellence in research and maximising innovation potential
- Strengthening equity and equal opportunities and promoting regional development

4 - What next?

How can HE systems respond?

What next: how can HE systems respond?

- **Higher Education has never been higher on the EU agenda**
- **Reforms are needed** to allow universities to play their full part in driving smart, sustainable and inclusive growth
- **No one-size-fits-all:** each country may find their own solutions
- **Graduate employability:** an increasingly important theme at the European, national and institutional level. More qualitative research needed
- **Learning from each other** will help to advance the modernisation agenda
- **European programmes and policy debate** can provide support and impetus
