# IET Academic Partners

Sally Davidson Jones
National Partnership Manager, the IET

Thank you for your support

Above: Victoria Critchlow, Academic Account Manager

Right: Jake Godfrey, IET Partnership Executive

The Institution of Engineering and Technology

Making the most of the partnership

- education
- professional registration
- awards & scholarships
- Publishing.

Open Access: Where next for Engineering research?

Ian Stoneham,
Content Development Manager, the IET

IET The Institution of
Engineering and Technology

Open Access is well established in the UK

- Green Versus Gold. Where are we?

- Most major Funders support OA. especially in the life sciences.

- The position of most funders on embargoes for green OA 'strike the right balance'.

- International acceptance for OA likely to gain pace (Horizon 2020 and others)

What IET Academic Publishing does now

- Publish **The Journal of Engineering**. A fully Gold OA journal offering rapid and 'painless' publication.

- Offer Creative Commons licences CC-BY or CC-BY-NC for open access articles.

- Offer a Gold OA options (hybrid model) for all our Research and Letters journal portfolio.

- Provide authors with a version of record of the finished published article for self archival.

The Institution of Engineering and Technology

THE JOURNAL OF ENGINEERING

IET Open Access Research

- Research is published based on scientific soundness rather than perceived significance.

- Binary decisions mean faster publication for authors.

- All content is available immediately online with no embargo period.

- Actively look to work with international funders to make sure we offer a compliant service to authors.

- Aim to encourage the publication of cross-disciplinary studies, Null/negative results, verification studies and case reports.

The Institution of Engineering and Technology

THE JOURNAL OF ENGINEERING

IET Open Access Research

Covers full range of engineering topics including:

- Electrical & Electronic engineering
- Mechanical engineering
- Energy engineering
- Civil engineering
- Micro- and Nanotechnology
- Computing & Software
- Biomedical engineering
- Materials engineering

The Institution of Engineering and Technology

There is a real need for OA leadership in the engineering community

- There is less enthusiasm for OA within the engineering community.

- Need for leadership in the OA debate: learned societies, funders and academia need to lead in the open access/open science arena.

- The development of a network of OA advocates and educators is needed to help researchers understand the issues around OA (funding for APC, Grant awarding bodies mandates, Creative commons licenses, Ref 2020)

There is an opportunity for the IET

- With academia and funders, become leaders in the OA debate.

- Become a trusted partner and the 'go to' place for up-to-date communication on OA, pertinent to the engineering community

- To be an innovator in OA and drive future change in scholarly communication and how the impact of research is measured.

- Encourage the development of standards for open data, data sharing, threaded publication, etc

The Institution of Engineering and Technology

Help us to shape the future of Scholarly Communication in Engineering
