

As the economic crisis begins to ease and a number of countries begin to see growth, many will look to engineering to help accelerate this recovery.

Engineering educators need to both share ideas of effective practice in preparing future engineers but also to anticipate future challenges. The annual SEFI conference, provides an excellent opportunity for educators, students, policy makers and industry to meet, debate and consider future directions.

As a major research and education university, the University of Birmingham is delighted to be hosting the SEFI 2014 conference in collaboration with SEFI member institutions in the UK.

Join us to learn, share and influence in September 2014.

Professor Kamel Hawwash, President of SEFI

## 15th - 19th September 2014

## University of Birmingham, UK

### Keynote Speakers

Professor Dr PE Seeram Ramakrishna, National University of Singapore

Dr Keith Willey, University of Technology, Sydney

Susan Scurlock, Chief Executive and Founder, Primary Engineer

Dr Cynthia Atman, University of Washington College of Engineering

Professor Alice Roberts, University of Birmingham
