

ACT FOR THE FUTURE DESIRES OF TOMORROW

CHALLENGES

Developed an understanding of the importance of sustainable development, in order to reestablish a balance between economy, society, and environment.

DID YOU KNOW?

More and more firms and local agencies are committing to sustainable development (Corporate Social Responsibility)

RESPONSIBLE ACTIONS

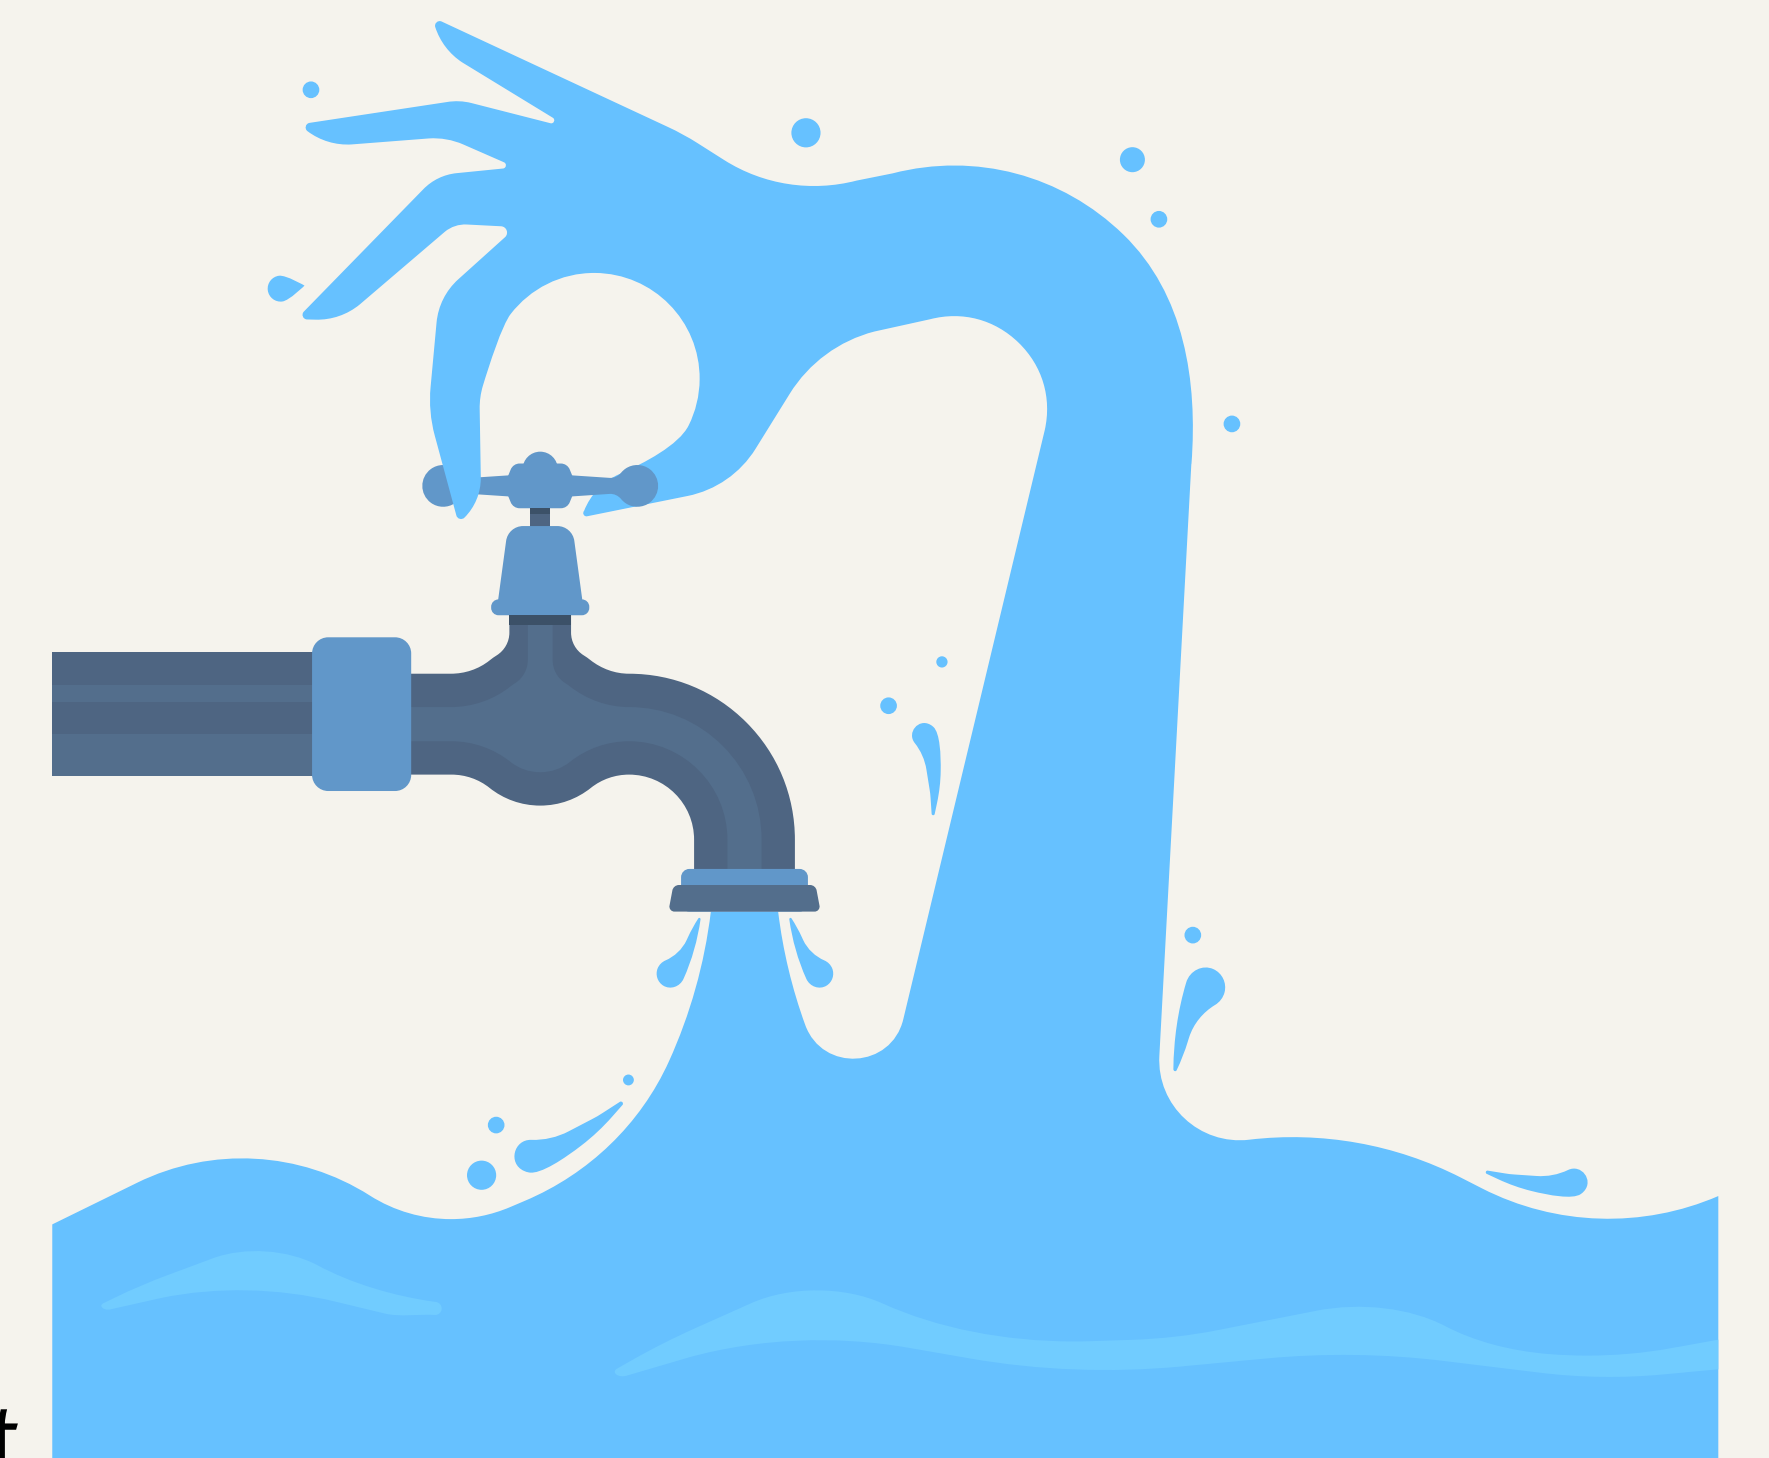

SAVE ENERGY

Developments and expenses associated to the production and consumption of energy urge businesses and individuals to use it more wisely.

BEWARE OF WATER

Water is a crucial resource for all forms of life on our planet. Making it drinkable and available to big populations is a long and costly procedure. It is therefore vital to preserve it from pollution and not to waste it because it is not endless.

RESPECT BIODIVERSITY

The diversity of species of microbes, animals, and plants, known as "biodiversity", is a key characteristic of life on earth. Preserving it, in its terrestrial and marine forms, makes it possible to meet the requirements of humanity, both today and tomorrow.

MOVE DIFFERENTLY

The transport sector is undergoing substantial changes. Relationships between public and individual transport, and between motorized transport such as cars, and "soft" transportation such as cycling are expanding. This is called "intermodality".

INVESTING IN FUTURE GENERATIONS

The transport sector is undergoing substantial changes. Relationships between public and individual transport, and between motorized transport such as cars, and "soft" transportation such as cycling are expanding. This is called "intermodality".
